INTRODUCTION

Education in Mauritius is compulsory from age five up to the age of sixteen. The present education system allows a pupil to study for a period of two years at pre-primary level. At the end of the primary cycle, of six years duration, Standard VI pupils sit for the Certificate of Primary Education (CPE) examinations. After 3 years of secondary schooling, students are required to sit for the National Form III Assessment, which aims at providing a "checkpoint" between the CPE examinations and the School Certificate (SC) examinations. The CPE examinations qualify pupils to a five-year secondary education leading to the Cambridge School Certificate or the General Certificate of Education (GCE-O Level). An additional two years of schooling prepares students for Higher School Certificate (HSC) or General Certificate of Education (GCE-A Level).

For students, who are unsuccessful at the CPE examinations at their second attempt or who have reached the age of 12 but unsuccessful in the examination, a pre-vocational stream exists in secondary schools for a period of three years with a specific, skills-based curriculum. After this, the students of this stream are able to integrate the Mauritius Institute of Training & Development (MITD) Centres to follow a one-year National Trade Certificate Foundation course, which, on successful completion, allows them entry in the vocational sector towards the various levels of apprenticeship and trade certificates.

On passing the HSC, students are eligible for post secondary and university studies offered by polytechnics and a number of tertiary and university education institutions, including the University of Mauritius and the University of Technology, among others.

The data refer to the Republic of Mauritius and cover pre-primary, primary, secondary (general and pre-vocational), technical and vocational, tertiary as well as education in specialised institutions.

Performance of students by subject - National Form III Assessment 2013

The National Form III Assessment aims at providing a 'checkpoint' between the CPE examinations and the School Certificate examinations. It allows schools, students and other stakeholders to take stock of the progress in learning which has taken place in lower secondary. Schools can therefore evaluate students' performance and, hence, they can make necessary adjustments in pedagogy.

The pass rate in English, French and Computer Studies was above 60% as compared to that in Mathematics, Biology, Chemistry and Physics, where the pass rate was 48.2%, 48.6%, 31.4% and 47.9% respectively.

Glossary

1 Adult Literacy Rate

Percentage of persons aged 15⁺ years who can, with understanding, both read and write a simple statement.

2 Apparent Intake Rate

Number of new entrants in Standard I in primary schools as a percentage of the population aged 5 years.

3 Gender Parity Index (GPI)

Ratio of the GER for female to the GER for male. It measures the relative education participation of boys and girls. A GPI of 1.0 reflects equal enrolment rate for boys and girls, whereas a GPI greater than 1.0 shows disparity in favour of girls.

4 Gross Domestic Product (GDP) at Market Price

The aggregate money value of all goods and services produced within the country out of the economic activity during a specified period of time usually a year (before provision for the consumption of fixed capital) at basic prices plus taxes on products.

5 Gross Enrolment Ratio (GER)

Number of pupils enrolled in a given level of education, regardless of age, expressed as a percentage of the population in the relevant age-group:

- 4-5 years for pre-primary level
- 6-11 years for primary level
- 12-19 years for secondary level
- 20-24 years for tertiary level

6 Literacy Gender Parity Index

The ratio of adult female literacy rate to adult male literacy rate. A perfect Gender Parity Index would imply that the index is equal to 1.0

7 Literacy Rate

Percentage of persons aged 12⁺ years who can, with understanding, both read and write a simple statement.

8 Population Growth Rate

It is the rate at which the number of individuals in a population increases in a given time period as a fraction of the initial population. Specifically, PGR ordinarily refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period.

9 Primary Completion Rate

The ratio of the number of pupils successfully completing the last year of primary school (Standard VI) in a given year to the total number of children aged 10 years in the population.

10 Pupil/Teacher Ratio

The average number of pupils per teacher at a given level of education in a given year.

11 Transition Rate

The proportion of pupils progressing from the primary cycle (i.e Std VI) to the Secondary cycle (Form I and Year I Prevoc), expressed as a percentage of the number of pupils enrolled at STD VI in primary school in the previous year.

12 Unemployment Rate

Unemployment rate is the ratio (%) of unemployment to labour force.
